Hey Dan,

Here are those figures with the updates. Take a look and let me know if you need anything else. Thanks!

Yes, these are perfect, almost. A few changes. Steve I added 3 sediment locations.

#### Map A.7-8

AE10 should be at the Frisco(Bagley) Tunnel; 37.932429, -107.581190

AE7 should be green and drop the A17A balloon.

Add CG3 (sediment green); California Gulch above Little Ida; 37.929406,-107.604405

Add CG4 (sediment green); Abv both Vermillion Mine and Tunnel and below Burrows Mine; 37.931368, -107.599004

Add CG6 (sediment green); California Gulch below Vermillion Mine Tributary; 37.932227, -107.596756

Hi All

Attached are maps and tables that summarize the sampling that EPA will be conducting next week. These tables and maps provide detail (and some modification) that was missing in the 2015 SAP. If you would like to view the whole SAP it can be downloaded at <https://drive.google.com/file/d/0BxEI0Fm1IzZmHNXzJzMi1nMnc/view?usp=sharing>.

An additional map(s) that depicts mine waste and sediment sampling location as described in “Aug2015 Sediment and MineWaste LocationsV2.xlsx” will be forthcoming.

TechLaw has rented a house at 961 Bluff Street, Silverton, Colorado 81433 and we will be meeting there at 3 pm on Monday Aug 3 for a H&S briefing, sampling protocols, gear organization and logistics for the week. Please make that if you can but if not we will fill you in on Tuesday morning.

Please feel free to contact me if you have questions or concerns.

Dan
